1.0 LIST OF FEATURES

Funeral arrangement tools

The purpose of this feature is to help users plan and coordinate the funeral activities. It has tools for planning, choosing a location, keeping track of guest lists, and organizing different funeral service components. These features provide user-friendly event planning that ensures the funeral service is not only emotionally meaningful but also logistically smooth.

Memorialization

This feature is designed to create a meaningful and personalized space for remembering the life of the departed individual. Basically , what it offers are Digital memorial Spaces which let the users create customized online memorials. Within these spaces,users can upload and organize a variety of elements,including images,videos,any stories of their life and written tributes to create an extensive and meaningful tribute. These features go beyond traditional memorial practices,offering a digital sanctuary where friends and family can come together to share memories and pay tribute in a way that is both heartfelt and technologically accessible.

Notification and RSVP Management

Smart funeral apps might have features for managing RSVPs and sending notifications to keep attendees informed. Updates on funeral plans, schedule modifications, and other pertinent information can be sent to users. This facilitates communication and guarantees that all parties are informed at all times. Users will receive important announcements and timely updates via Automated Notification system ensuring clear and efficient information dissemination. In order to help the organizers plan an event precisely,attendees can confirm or decline their attendance using the user-friendly interface of the RSVP system. The RSVP system real-time updates offer insightful information for improved coordination. The feature also has two way communication channels so that guests can express special requests or ask questions. Essentially,this feature seeks to improve the entire funeral planning process during delicate and trying time by establishing a structured and encouraging communication framework.

Donation and Fundraising Integration

Users can make donations in honor of the deceased to help with funeral costs or a specific cause. It gives users access to a safe platform with a range of payment choices and enables

them to start fundraising campaigns that tell the cause's narrative. By outlining precisely how money will be spent, giving receipts, and acknowledging contributors, the feature assures transparency. After the campaign is over, the system generates reports on the funds raised and their impact. Users can easily share campaign links for greater reach.

Grief Support Resources and feedback

This feature offers users a collection of coping resources, including videos and articles, to help them through the grieving process. Additionally, it promotes a sense of community by facilitating connections through online support groups. The feature also has a feedback system where users can share their thoughts and recommendations to improve the funeral system coming ahead. This will help to improve understanding and support for users during the grieving process.

1.1 LIST OF FUNCTIONS

Funeral management tools

An easy-to-use Event Planning Dashboard serves as the main focus of the Funeral Arrangement Tools feature, giving users a centralized platform for conveniently creating, editing, and managing funeral events. A visual timeline is integrated into the dashboard to provide a clear overview of the planned activities. Reminders and checklists make planning easier by providing prepared and editable task lists that guarantee careful attention to detail and no errors. Furthermore, the incorporation of Interactive Maps and Directions not only improves the user experience but also offers accurate navigation guidance to the location. Together, these streamlined tools aim to facilitate a thoughtful and well-organized approach to funeral planning during a sensitive time.

Memorialization

With the help of the Digital Memorial Spaces function, users can create personalized and heartfelt online memorials, giving them a special place to express their memories and feelings. This feature allows friends and family to create a virtual space where they can all contribute to the memory of the deceased, which helps to create a sense of permanence and connectivity. By providing a timeline of important events from the person's life, the Timeline of Life Events enhances this memorial experience. This graphic story transforms into a moving trip through significant occasions and treasured memories, producing an all-encompassing and sincere homage. Additionally, Customization Options give users the ability to add themes, colors, and layout options to the memorial to make it genuinely unique and meaningful, reflecting the unique personality and preferences of the deceased. When combined, these Memorialization feature functionalities aim to celebrate and honor each person's distinct life story in a digital environment that appeals to their emotions and sense of personalization.

Notification and RSVP Management

Within the funeral planning system, the Notification and RSVP Management feature serves as a thorough communication and coordination center. Automated Notifications are the main attraction. They make sure that communication is clear and consistent by providing attendees with timely updates and important announcements via the channels of their choice. Through the RSVP System's user-friendly interface, attendees can confirm their attendance or offer

regrets, which streamlines the planning process for organizers. Organizers can see a dynamic view of attendee responses with real-time updates, which makes coordination more efficient. Two-way mediums of communication encourage participation by allowing participants to ask questions or make specific requests. Event Reminders guarantee that guests are ready for the funeral service that is about to take place. Personalized communications can be tailored by organizers with Customizable Messaging, and comprehensive attendance reports provide a list of confirmed attendees. In addition, the platform acts as a venue for guest interaction, allowing messages, condolences, and more details to be shared. Hence, taken as a whole, these features provide a strong system that not only effectively handles the logistics but also interacts with guests in a helpful and accommodating way during this sensitive period.

Donation and Fundraising Integration

The Donation and Fundraising Integration feature in this funeral system encompasses a range of functionalities to facilitate financial contributions and support. It begins with an Integrated Donation Platform, ensuring a secure space for monetary contributions while accommodating various payment methods. Users can leverage Fundraising Campaigns, creating and launching personalized initiatives with defined goals, descriptions, and durations. Transparency is a key focus, with clear communication on how donated funds will be allocated, accompanied by receipts and acknowledgment for donors. Tools for Promotion and Sharing enable the widespread dissemination of campaigns through shareable links on social media and other platforms. Post-Campaign Reporting generates comprehensive financial and impact reports, sharing success stories and outcomes. The feature also includes Customizable Campaign Pages, allowing users to tailor the appearance and content of their campaigns with multimedia elements. Donor Recognition features express gratitude through acknowledgment messages or donor honor rolls. Security is paramount with a Secure Payment Gateway, ensuring the safety of all financial transactions. Lastly, Campaign Progress Tracking offers real-time insights into the progress of fundraising initiatives, motivating donors by showcasing achievements and milestones within the context of funeral-related financial needs.

Grief Support Resources and feedback

Helping people through the grieving process is made compassionate and user-centric with the Grief Support Resources and Feedback feature. An organized Resource Library functions as a

thorough archive, classifying grief support resources, including articles and videos, for convenient retrieval. By encouraging community involvement through Online Support Groups, where users can join and participate in groups with similar experiences, the platform goes beyond simply providing information. A feedback mechanism that enables users to share their experiences and offer insights into the efficacy and user-friendliness of the available grief support resources is integrated to ensure ongoing improvement and relevance. A Community Forum also gives users a platform to talk about their own experiences, which helps those who are grieving feel connected to one another and as a community.

1.2 LIST OF FUTURISTIC UPDATES

1. Virtual Reality (VR)

Smart Funeral app can implement the use of Virtual Reality (VR) by offering users a personalized, immersive space for remembering. Users can access virtual reality memorials that replicate actual locations or create personalized settings that are meaningful to the deceased person. In especially for those who are unable to attend in person, this virtual presence promotes a sense of connection and inclusivity. In addition to interactive features like virtual notes and ceremony participation, the app offers visual and aural enhancements like movies, images, and custom soundscapes that contribute to the creation of a profoundly meaningful and emotional environment. This cutting-edge method not only allows for time-shifted access and remote participation, but it also aids in the grieving process by providing a special and consoling means for people to honor and remember their loved ones.

2. Artificial Intelligence (AI)

Other than that, Artificial Intelligence also can be used in the Smart Funeral app. AI enhances the user experience by offering chatbots driven by AI with immediate assistance, personalized grief support, and sentiment analysis for compassionate communication. While content curation and recommendation provide users with individualized insights and coping mechanisms, intelligent notifications powered by AI algorithms guarantee timely reminders and content delivery in line with individual preferences. In order to create a polite and encouraging community, AI is also involved in automated content moderation. AI strengthens privacy protections and spots possible security risks with an emphasis on data security, guaranteeing a safe environment for users to exchange memories. AI-powered predictive analytics also helps with service planning, enabling planned and well-anticipated memorial ceremonies.

3. Augmented Reality (AR)

Besides, futuristic updates in our Smart Funeral app like Augmented Reality can revolutionize how users interact with memorial experiences. AR can be used to develop interactive and engaging app features. For instance, users can use AR to add a layer of digital memory to real-world locations by superimposing digital content, such as images, videos, or messages over physical objects or spaces. This might also apply to augmented reality-enhanced memorial sites

or markers, which would let users access more multimedia content while using their device's camera to view a headstone or memorial plaque. Moreover, holographic depictions of departed loved ones could be projected during memorial events by AR features, enabling a distinctive fusion of the real and virtual worlds.

4. Smart Wearables

This futuristic update transforms the user experience by bringing features that allow technology and the grieving process to coexist harmoniously. These wearables track physiological indicators with biometric sensors built in, giving the app's customized grief support features an understanding of the user's emotional state. With the help of smart wearables, people can virtually attend memorial events by taking part in VR or watching live. When users approach significant locations connected to the deceased, GPS-enabled devices send out location-based reminders with personalized content. Wearables with audio capabilities can play recorded messages or songs from your favorite playlist, turning them into portable archives of treasured moments. Hands-free interactions are made possible by gesture recognition technology, which guarantees a user-friendly experience even in highly emotional situations. Wearable bios that provide key details about the deceased allow for a more concrete connection to be made. Integrate with smart wearables to monitor users' health and provide insights into stress levels, sleep patterns, and other health metrics while they grieve. Support resources could be customized based on this information.

5. Internet of Things (IoT)

The integration of the Internet of Things (IoT) into apps for smart funerals brings a range of features that improve user experience and provide more individualized and integrated services for bereavement. Gravestones and memorials equipped with Internet of Things (IoT) technology usher in a new era of memorialization by integrating devices that let visitors engage with multimedia content related to the deceased. While IoT-enabled cameras and streaming devices enable virtual attendance at memorial services, real-time environmental monitoring guarantees the preservation of memorabilia. When someone interacts with or places flowers at a gravesite, smart floral arrangements with sensors alert users. During memorial events, location-based services and interactions are further enhanced through integration with smart wearables. Environments are controlled by automated lighting and climate control, and security

is strengthened by IoT-connected devices that prevent unwanted access. Inventory control and automated scheduling improve the efficiency of resource management. Furthermore, IoT enables users to have constant connections with their loved ones' memories and receive personalized reminders and notifications.

2.0 NOTES OF CONCEPTUAL DESIGN

1. Funeral Arrangements Tools

A user-centric platform that skillfully leads users through the practical and emotional aspects of funeral planning is envisioned in the conceptual design for the Funeral Arrangement Tools feature of the Smart Funeral app. Easy access to planning tools, venue selection, guest list management, and organizers for different service components are made possible by the user-friendly dashboard. With features that facilitate communication, cooperation, and logistical coordination, the design guarantees a thorough and well-organized funeral planning process. The feature aims to give users a sensitive and easy-to-use tool that strikes a balance between the practicalities of organizing a meaningful funeral service and the emotional significance of the occasion. It prioritizes privacy, sensitivity, and scalability.

2. Memorialization

The Smart Funeral app's Memorialization feature's conceptual design imagines a kind and cutting-edge platform that allows users to create customized online memorials, creating a poignant environment for honoring the life of the deceased. Digital Memorial Spaces are introduced in the design, enabling users to create personalized tributes through the uploading and arrangement of multiple elements such as written tributes, life stories, videos, and images. User-friendliness is given top priority in the interface, making it easy for users to interact with and contribute to these virtual havens. Through a collaborative space where friends and family can share meaningful memories and pay tribute in a way that is both emotionally resonant and technologically accessible, the conceptual design seeks to go beyond traditional memorial practices. By offering users a sensitive, welcoming, and profoundly meaningful digital memorialization experience, this feature aims to respect the legacy of the deceased.

3. Notification and RSVP Management

The Smart Funeral app's Notification and RSVP Management feature's conceptual design aims to improve the funeral planning process at a sensitive and difficult time by providing an organized and effective communication framework. An automated notification system is incorporated into the design to guarantee that users receive critical updates and announcements regarding funeral arrangements, schedule changes, and other pertinent information on time. With its easy-to-use interface, the RSVP system lets guests confirm or decline their attendance and

offers real-time updates for better planning. The feature's two-way channels of communication allow visitors to ask questions or make special requests, creating a helpful and accommodating atmosphere. Clarity, efficiency, and user-friendliness are highly valued in the conceptual design, which aims to reduce the administrative load during the funeral planning process and establish a framework for orderly and supportive communication for all parties involved.

4. Donation and Fundraising Integration

The aim of the Smart Funeral app's Donation and Fundraising Integration feature's conceptual design is to offer a clear, easy-to-use platform for monetary donations made in memory of the departed. To ensure user-friendliness, the design integrates a secure interface with multiple payment options. Users have the ability to start customized fundraising campaigns that clearly tell the story of the cause. With a focus on openness, the feature provides a detailed plan for the use of donated funds, provides receipts, and gives contributors recognition. Following the campaign, the system produces comprehensive reports on the money raised, giving users a thorough picture of the funding received and its results. Users can easily share campaign links to increase outreach and encourage a group effort to help with funeral expenses or a particular cause. The goal of the conceptual design is to give users a meaningful, effective, and caring way to honor and remember the deceased.

5. Grief Support Resources and feedback

An all-encompassing and sympathetic support network for users navigating the grieving process is envisioned in the conceptual design for the Smart Funeral app's Grief Support Resources and Feedback feature. The layout incorporates a carefully chosen selection of coping materials, including articles and videos, providing users with a wide array of instruments to support their emotional journey. By connecting users through online support groups, the feature encourages a sense of community by giving them a forum to connect and support one another. Furthermore, by encouraging users to share their opinions and suggestions, the feedback system helps to improve the funeral system continuously. By maintaining responsiveness to user needs through two-way communication, the app improves understanding and support during the sensitive and difficult time of grief. In order to give users comprehensive and caring support, the conceptual design aims to combine communal and informational components.

2.1 EVIDENCE GATHERING

1. Funeral Arrangements Tools

The Smart Funeral app's Funeral Arrangement Tools feature's conceptual design is based on meticulous methods for obtaining evidence. We learn about user requirements, preferences, and difficulties in the funeral planning process through user surveys, interviews, and usability testing. Focus groups and prototype feedback sessions help to further hone the design by capturing its useful features and emotional resonance. Prioritizing features is informed by data analytics and competitor analysis, and a user-centric approach is ensured through user persona development. Iterative improvements are made possible by pilot testing and a continuous feedback mechanism built into the app. Surveys conducted after the product's release evaluate actual user experiences, confirming that the Funeral Arrangement Tools offer a well-structured, sensitive to the needs of users, and easy-to-use funeral planning platform. In order to enable meaningful funeral services, the design places a high priority on privacy, sensitivity, and scalability. It represents a well-balanced fusion of emotional significance and practicality.

2. Memorialization

Thorough data collection supports the conceptual design of the Smart Funeral app's Memorialization feature. We learn important information about user expectations, preferences, and emotional needs during the memorialization process through user surveys, interviews, and prototype testing. Bereaved individuals' focus groups yield complex viewpoints, and competitor analysis guides the development of features. The prototype's efficacy is measured by usability metrics and emotional impact assessments, which guarantee intuitive interactions and emotionally impactful experiences. Pilot testing in a real-world environment with actual users confirms the design's usefulness and emotional impact. Including a post-launch feedback system makes ongoing development even easier. This evidence-based strategy seeks to provide a technologically accessible, user-centric, and compassionate platform that transcends conventional memorial customs and creates a digital space where people can sensitively and meaningfully celebrate the life of the deceased.

3. Notification and RSVP Management

The Smart Funeral app's Notification and RSVP Management feature was conceptually designed using a rigorous evidence-gathering methodology. Users' preferred methods of communication during the delicate funeral planning process are revealed through user interviews, questionnaires, and prototype testing. The user interface is improved through usability testing and feedback sessions, which also evaluate how effective the communication framework is. Bereaved people's focus groups provide complex viewpoints that guarantee the design satisfies the particular requirements of users in this situation. Continuous improvement is facilitated by the app's feedback mechanisms and post-launch surveys, and the usefulness of the feature is confirmed by data analysis of comparable systems and real user pilot testing. The design places an emphasis on efficiency, clarity, and user-friendliness with the goal of reducing the administrative load and creating a structured and encouraging communication framework for all concerned parties during a trying time.

4. Donation and Fundraising Integration

Thorough evidence collection served as the foundation for the conceptual design of the Smart Funeral app's Donation and Fundraising Integration feature. We learn important information about users' expectations for transparency, preferences for payment methods, and attitudes towards monetary donations through user surveys, interviews, and prototype testing. The user interface is improved through usability testing and feedback sessions, which also evaluate how easy it is to launch fundraising campaigns. Potential donor focus groups offer complex viewpoints that guarantee the design takes user motivations and concerns into account. Continuous improvement is facilitated by the app's feedback mechanisms and post-launch surveys, and the usefulness of the feature is confirmed by data analysis of comparable systems and real user pilot testing. User-friendliness, fund usage transparency, and a heartfelt, meaningful platform for users to pay tribute and remember the deceased with money contributions are given top priority in the design.

5. Grief Support Resources and feedback

Thorough evidence collection creates the core of the conceptual design for the Smart Funeral app's Grief Support Resources and Feedback feature. Through surveys, user interviews, and prototype testing, the team learns a great deal about the complex needs and preferences of people going through the grieving process. The selection of widely accepted and efficacious

grief resources is guided by content analysis of the currently available resources. Grieving people's focus groups offer firsthand insights into their emotional needs and preferences for virtual grief support groups. Usability testing makes sure that users can interact with and navigate the offered support materials with ease. Continuous improvement is made possible by post-launch surveys and ongoing feedback mechanisms within the app, and the usefulness of a feature is evaluated through an analysis of user engagement metrics. In order to create a comprehensive and compassionate support network that changes with users throughout the delicate and challenging grieving process, the design places a high priority on a combination of communal and informational components.

LOG IN→MENU→PLAN

A hand-drawn login screen for a system titled "FUNERAL SYSTEM". It features a title bar with the text "FUNERAL SYSTEM". Below the title, there is a "Email" input field with a checkmark icon. Below that, there are two input fields: "Username" with a person icon and "Password" with a lock icon. Below the password field, there is a "Remember me" checkbox and a "Forgot password?" link. At the bottom, there are two buttons: "LOGIN" and "SIGN UP".

A hand-drawn menu screen titled "Menu". It features a central cluster of five circular buttons: "Plan" (top), "Donate" (left), "memories" (center), "Announcement" (right), and "Grief Support" (bottom). At the bottom of the screen, there are two buttons: "menu" (left) and "Profile" (right).

A hand-drawn plan screen titled "Plan". It features a "Welcome back, Username!" message. Below the message, there is a "Timeline" section with a "Next 7 days" dropdown and a "Sort by dates" dropdown. Below the timeline, there is a "Search by name" input field. Below the search field, there is a date "Friday, 1 December 2023" and a notification for "Username2's funeral" with an "inviter's note" and "accept" and "decline" buttons. Below the notification, there is a "New event" section with a form containing "event's name", "inviter's note", "Date" (with a date picker showing "2/12/2024"), and "Time" (with a time picker showing "08:00"). At the bottom, there is a "Send to:" label and a "search" input field.

LOG IN→MENU→MEMORIES

A hand-drawn login screen titled "FUNERAL SYSTEM". It features a header with the title, a "Email" input field, and a "password" input field with a toggle for visibility. Below the password field are checkboxes for "Remember me" and a "Forgot password?" link. At the bottom are "LOGIN" and "SIGN UP" buttons, with another "Forgot password?" link below them.

A hand-drawn menu screen titled "Menu". It features a central cluster of five circular buttons: "Plan" at the top, "Donate" on the left, "memories" in the center, "Announcement" on the right, and "Grief Support" at the bottom. At the bottom of the screen are two buttons: "menu" with a grid icon and "Profile" with a person icon.

A hand-drawn memories screen titled "Memories". It features a header with a back arrow, a user profile "Tania" with a "Following" status, and a grid of memory cards. The cards include: "few days ago", "11 year ago", a timeline diagram, a "+" button, a card with a family drawing and text "He and my family having dinner at Kak Jue Steamboat" dated "8 years ago", and a card titled "My best friend" dated "1 month ago". At the bottom is a toolbar with icons for gallery, video, play, edit, and search, followed by "Menu" and "Log out" links.

LOG IN→MENU→ANNOUNCEMENT

A hand-drawn login screen for a 'FUNERAL SYSTEM'. At the top, the title 'FUNERAL SYSTEM' is written in large, bold letters. Below it, there is a 'Email' field with a checkmark icon. Underneath, there are two input fields: 'username' with a person icon and 'password' with a lock icon. To the right of the password field is a 'Forgot password?' link. Below these fields are two buttons: 'LOGIN' and 'SIGN UP'. At the bottom, there is another 'Forgot password?' link.

A hand-drawn menu screen titled 'Menu'. In the center, there are five circular buttons arranged in a cross pattern: 'Plan' at the top, 'Donate' on the left, 'memories' in the center, 'Announcement' on the right, and 'Grief Support' at the bottom. At the bottom of the screen, there are two buttons: 'menu' with a grid icon and 'Profile' with a person icon.

A hand-drawn announcements screen titled 'Announcements' with a close button (X) in the top right corner. Below the title, there is a bell icon with the text 'Latest updates' underneath it. The screen lists three announcements: 1. 'Username2's funeral' with a person icon and the text '*confirm your attendance by 02-12-2024'. 2. 'Grief support is now available' with an information icon (i). 3. 'Service Announcement' with a crossed wrench and screwdriver icon and the text '*New update available'. At the bottom, there is a section labeled 'no more updates'.

LOG IN→MENU→DONATE

A hand-drawn login screen titled "FUNERAL SYSTEM". It features a "LOGIN" button and a "SIGN UP" button. Below the login button is a "Remember me" checkbox and a "Forgot password?" link. The screen includes input fields for "username" and "password", each with an icon (a person for username, a lock for password). There is also a "Forgot password?" link below the password field.

A hand-drawn menu screen titled "Menu". It features a central area with five circular buttons: "Plan", "Donate", "memories", "Announcement", and "Grief Support". At the bottom, there are two buttons: "menu" (with a grid icon) and "Profile" (with a person icon).

A hand-drawn donate screen. It features a "DONATE NOW SAVE LIFE" button. Below this is a "DONATE" button. The screen includes a "Donation amount" section with buttons for "RM50", "RM100", and "RM500", and a text input field for "Other amount: RM". There is a "Make this as a monthly donation" checkbox. Below this is a "Acc Number" section with a "VISA" button and a text input field for "email address". At the bottom is a "DONATE NOW" button. On the right side, there is a sidebar with links: "My Fund", "Fund updates", and "Menu".

LOG IN→MENU→GRIEF SUPPORT

A hand-drawn login screen for a 'FUNERAL SYSTEM'. At the top, the title 'FUNERAL SYSTEM' is written in large, bold letters. Below it, there is a small 'Email' field. The main section contains a 'Username' field with a person icon and a 'Password' field with a lock icon. Below the password field, there is a checkbox labeled 'Remember me' and a link 'Forgot password?'. At the bottom, there are two buttons: 'LOGIN' and 'SIGN UP'.

A hand-drawn menu screen. At the top, the title 'Menu' is written. The main area contains five circular buttons arranged in a cross pattern: 'Plan' at the top, 'Donate' on the left, 'memories' in the center, 'Announcement' on the right, and 'Grief Support' at the bottom. At the bottom of the screen, there are two icons: a grid icon labeled 'menu' and a person icon labeled 'Profile'.

A hand-drawn support screen. At the top, the title 'Support' is written, followed by a right-pointing arrow icon. Below the title is a large heart icon. Underneath the heart, the text 'Hi, how can we help you?' is written. Below this text is a search bar with the placeholder text 'Enter the search term here...' and a magnifying glass icon. At the bottom of the screen, there is a section titled 'All articles' which contains a list of four articles, each preceded by a heart icon: 'Self-therapy helps a mom who's losing a daughter last week', 'How to apologize someone', 'A husband shared tips to avoid sadness after losing his wife', and 'How to increase self-love'.
